• **Admission**

Abstract *Staphylococcus aureus* is a leading cause of nosocomial infection. The purpose of this study was to determine the prevalence of *S. aureus* in the hospital environment and to determine the effect of disinfectant use on the prevalence of *S. aureus* in the hospital environment. A total of 100 samples of *S. aureus* were collected from the hospital environment. The prevalence of *S. aureus* was determined by the number of samples collected from the hospital environment. The effect of disinfectant use on the prevalence of *S. aureus* was determined by the number of samples collected from the hospital environment. The prevalence of *S. aureus* was determined by the number of samples collected from the hospital environment. The effect of disinfectant use on the prevalence of *S. aureus* was determined by the number of samples collected from the hospital environment.
